

# Government Project Profile—Belfast City Hall

**LOCATION:** Donegal Square North, Belfast  
**CLIENT:** Belfast City Council  
**MAIN CONTRACTOR:** JD McGeown  
**COMPLETION DATE:** March 2013

## PROJECT DESCRIPTION

Belfast City Council retained JD McGeown Ltd on the basis of its capability and capacity to deliver against its bespoke requirements on the installation of a revolutionary and new “intelligent” lighting system.

JD McGeown Ltd delivered to the challenges presented by this project. These included installation within a 6 week time frame, secured through meticulous pre planning and team management working together with Belfast City Council’s Property Maintenance Office.

Belfast City Hall is a listed and landmark building where our engineers were presented with health and safety difficulties which were managed and overcome. The installation of the unique lighting system at the iconic Belfast building demanded that our engineers gain access to non-traditional electrical routes which were potentially time consuming and high risk.

## SERVICES

It involved the installation of new technology utilising state of the art LED lighting. 433 LED lights were installed while 358 lights were disposed of from Belfast City Hall together with associated cabling.

The new “IntelliPower” light fittings can be individually controlled to illuminate Belfast City Hall in a wash of 16 million different colours.

Windsor Business Park, 16-18 Lower Windsor Avenue, Belfast, BT9 7DW
