

LOCATION: Lisburn Road, Belfast
CLIENT: BHSC
MAIN CONTRACTOR: McAleer & Teague
COMPLETION DATE: Feb 2015

PROJECT DESCRIPTION

This project involved the development of sectional buildings at Belfast City Hospital.

These modular type units are a temporary solution but demand to be fully operational and hence must be fully electrically compliant for our client.

We view health and safety and environmental management to be of paramount importance during all projects, particularly so in the case of acute hospital sites.

Extensive coordination by our team and with the Belfast Health and Social Care Trust ensured completion of the works were secured on time and within budget.
